Questions

Strengths/Weaknesses

Your Answer

Really a great concept that is well-executed. The first part of the second act lacks tension, but otherwise the script is tight.

Reader Suggestions

Consider upping the threat that he faces with releasing this 'weapon'. Because he knows exactly where and when, the tension lessens. Possibly making the release a little less predictable might add some tense moments. May not be right for your script, but something to think about or play with. This is somewhat nit-picking, but this script is so close.
